

Chestnut Class Topic Projects - Autumn Term

To be in school from Monday 5th December 2016.

We will be presenting the projects throughout the week so all projects should be in school by **FRIDAY 9th December 2016** so as to display for families in Celebration Assembly on Friday.

Children must complete **ONE** task but are welcome to do more if they would like to.

Science Project

We are looking at the habitats of polar animals

Create a polar habitat and include the animals that would be found there.

You can create this in any way you want, a picture, a collage or a 3D model.

Creative Project

This project relates to polar animals.
Create a polar animal.

Use whatever you want... junk modelling, modelling materials or draw a picture.

History Project

Investigate a famous explorer of the polar regions.

This could be a historical figure such as Robert Falcon Scott or someone more recent.

You could use a poster, a fact book or a computer to produce your project.

English Project

Write a wintery poem.

Create a poem based on the theme of 'winter'. It can rhyme, be an acrostic poem or just be descriptive.

You could decorate your poem with wintery images too.

Parents / Carers, can you please sign and return this slip to **Miss Gray**.

I am aware that my child has this homework project and needs to spend approximately 2 hours on the work; also that the project should be in school by **FRIDAY 9th December 2016**.
